

# TeeJet® 844 Series Sprayer Controls

The TeeJet 844 Sprayer Control offers spraying advantages not found in other controllers. Designed with simplicity in mind, computer-controlled spraying has never been so easy. Simply set your target application rate and the unique VisiFlo

display on the 844 helps select the right TeeJet tip for the application. Once spraying begins, the large display shows application rate, volume sprayed, system pressure, sprayer speed, and area covered.

The built-in planning tool on the 844 automatically displays the speed needed to achieve the target rate with the specified tip. It will also calculate the pressure necessary for achieving the target application rate when the speed is entered.

The 844 is available in a complete package with the valves, cables and sensors needed to put together a total sprayer control system, or as an individual controller.

## Features:

- Full-featured sprayer control with industry-leading ease of use.
- Large backlit display shows all spraying information at a glance.
- Color-coded tip selection for easy programming.
- Communication port for PC and GPS interfacing.
- Flow- or pressure-based regulation options provide reliability and flexibility.
- Five boom section switches plus master shutoff.
- Durable, weather-resistant aluminum housing.
- Single cable connection for quick hookup.

## How to Order

| PART NUMBER | DESCRIPTION                              |
|-------------|--|
| 90-02251    | 844E-5 Core Kit with 16'/5m main harness |
| 90-50143    | 844E-5 Core Kit without cables           |

The TeeJet 844-AB is designed exclusively for orchard spraying and is available with a conventional wiring system or junction box to customize features.

## Features:

- Convenient operation. Individual boom control switches allow the operator to accurately manage spray application by changing spray patterns according to tree height.
- Greater accuracy. When a boom section is shut off, the system can automatically maintain system pressure. This prevents over-application when spraying sections of smaller trees.
- Improves efficiency. Individual boom controls allow you to shut off boom sections from the tractor seat. Time will no longer be wasted getting on and off the tractor to shut off valves.
- On-the-go swath width adjustment allows operator to go from one orchard to another without reprogramming.
- Automatic control is fast and stable.
- Built-in planning tool helps match application rate, tip capacity, and pressure.
- Large backlit display shows all spraying information at a glance.
- Control up to four boom sections plus master shutoff.
- Flow- or pressure-based regulation options provide reliability and flexibility.
- Single cable connection for quick hookup.

## How to Order

| PART NUMBER | DESCRIPTION  |
|-------------|--|
| 90-50018    | Core Kit, 844-AB-4 (console with mounting brackets, cables and manual) |
| 75-50007    | Console only, 844-AB-4   |
